

Senior Python Engineer

San Francisco, CA | Full-Time | \$180K-\$220K

ABOUT THE ROLE

Join our engineering team as a Senior Python Engineer. You will design and lead our backend infrastructure, mentor junior developers, and drive architectural decisions across our platform.

REQUIRED QUALIFICATIONS

Experience & Skills:

- 7+ years of professional software development experience
- 5+ years specifically with Python programming
- Expert proficiency in Python, especially async/await frameworks
- Advanced knowledge of AWS cloud services: EC2, S3, Lambda, RDS, CloudFormation
- Strong expertise in Docker containerization and orchestration
- Kubernetes administration and deployment experience
- CI/CD pipeline design and implementation: Jenkins, GitLab CI, GitHub Actions
- SQL database design and optimization: PostgreSQL, MySQL
- NoSQL databases: MongoDB, Redis, DynamoDB
- RESTful API design and implementation using FastAPI or Django
- Microservices architecture and design patterns
- Git version control and workflow management
- Linux/Unix system administration and shell scripting

Education:

- Bachelor of Science in Computer Science
- Bachelor of Science in Software Engineering
- Master of Science in Computer Science (preferred)
- Master of Business Administration (preferred)

Certifications (Preferred):

- AWS Certified Solutions Architect - Professional
- AWS Certified Solutions Architect - Associate
- Certified Kubernetes Administrator (CKA)
- AWS Certified Developer - Associate

KEY RESPONSIBILITIES

- Lead design and implementation of scalable backend systems
- Drive architectural decisions and lead code reviews
- Mentor and develop junior engineers on the team
- Optimize system performance, reliability, and cost efficiency
- Collaborate with DevOps engineers on infrastructure automation
- Participate in on-call rotation for production support
- Champion best practices and engineering standards

NICE TO HAVE

- Experience with data engineering or machine learning pipelines
- Contributions to open source projects
- Experience with Terraform or Infrastructure as Code
- Knowledge of system design and scalability
- Experience mentoring or leading engineering teams

BENEFITS & PERKS

- Competitive salary: \$180,000 - \$220,000 per year
- Equity options with 4-year vesting
- Flexible remote work policy (40% remote, 60% in-office)
- Comprehensive health insurance: medical, dental, vision, life
- 401(k) matching up to 5%
- Generous PTO: 20 days vacation, 10 holidays, unlimited sick days
- Professional development budget: \$2,000 per year
- Learning stipend for courses and certifications
- Home office equipment stipend
